EDUCATION

Institute of Aeronautical Engineering

B.Tech Computer Science Engineering (Data Science) IV-Sem

Expected graduation – 2028

CGPA: 8.1

Narayana Junior College

Intermediate

2022–2024

Score: 965/1000

Blue Bells High School

SSC

2022

GPA: 9.8

TECHNICAL SKILLS

Languages: Java, Python

Web Development: HTML, CSS

Tools: Git, GitHub, VS Code

PROJECTS

AI Resume Analyzer | GitHub

February 2026

- Developed an AI-powered Resume Analyzer to evaluate resumes against job descriptions using Natural Language Processing techniques.
- Implemented TF-IDF vectorization and cosine similarity to calculate resume-job match percentage and ATS score.
- Built an interactive interface for uploading PDF resumes and extracting structured text using automated preprocessing.
- Output: Generated match score, highlighted missing skills, and provided improvement recommendations to optimize resumes for ATS systems.
- Applied text preprocessing techniques including tokenization, stopword removal, and lemmatization to improve analysis accuracy.

Bus Route Finder System | GitHub

January 2026

- Developed a Java-based route optimization system to calculate the shortest path between two bus stops using graph data structures.
- Implemented Dijkstra's Algorithm for efficient shortest path computation.
- Applied Object-Oriented Programming principles to design scalable route and node management.
- Output: Displays optimal path and total distance between selected source and destination stops.
- Integrated file handling for dynamic storage and retrieval of route data.

CERTIFICATES

Smart India Hackathon – Selected for SIH 2nd round

September 2025

Codesurfers Hackathon – Participated in 36-hour coding challenge

September 2025

Cognifyz Technologies – Web Development Internship Offer

March 2025

CODING PROFILES

LeetCode: Solved 50+ problems.

HackerRank: 2-star in Python.

CodeChef: Solved 250+ problems.
